HOW TO USE SMART OBJECTS TO CHANGE IMAGE/COLOR ?

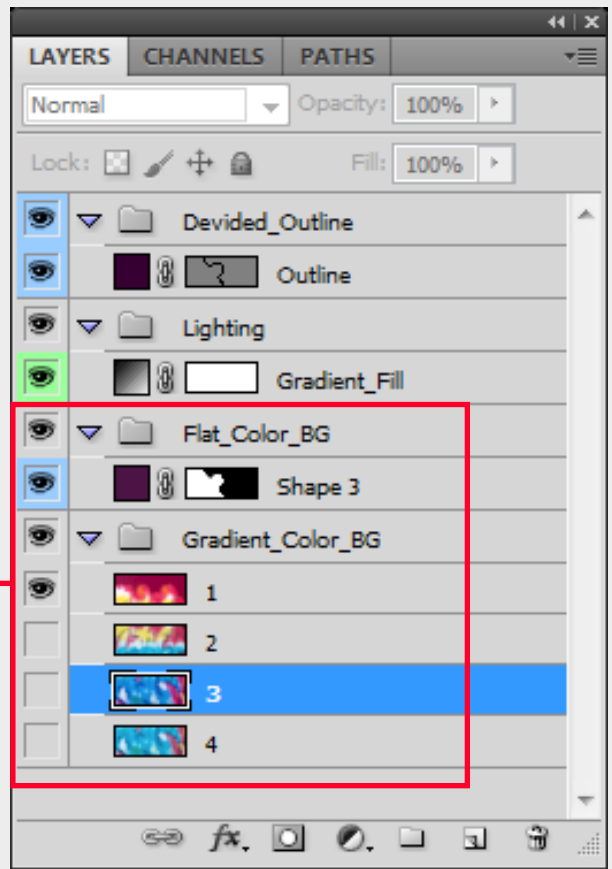

For Example BG (Background)

Look for this option in layer panel (BG_Option > Place_Your_BG_Here)

Double click on square (Smart Object) to change or replace BG. It will take you to the new Photoshop file.

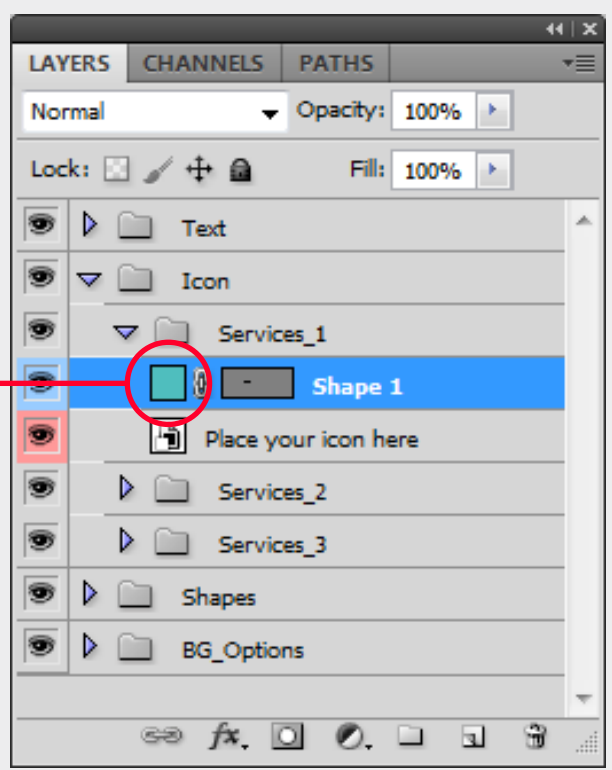

In new PSD file, different layers/groups are available for Flat_Color_BG and Gradient_color_BG you can use those as it is or you can replace it with your image. Save (Ctrl+S) the file. Changes will automatically reflect in your main file.

HOW TO USE SHAPE TO CHANGE COLOR QUICKLY ?

To change color quickly according to your brand you just need to double click on this square and change color.

HOW TO INSERT YOUR IMAGE BY USING CLIPPING MASK ?

To replace this image, put your desired image here.

OR

You can delete this image. Copy paste your image here. Right click on layer and click on create clipping mask option.
